

**Guidance on registering and completing the DCD (dyspraxia) MacHealth GP training course:**

- In the upper right hand corner, click on “Create an Account.” Complete this process.
- Once you have set up your account, go back to the machealth.ca website and click “Log In” in the upper right hand corner.
- Click “View our programs”. Once registered, you can freely access any of the 25 plus modules that are listed as many times as you wish.
- Scroll down until you get to the DCD module. Click on it to enter.
- You will be able to click on “Begin Course.” Once you start, you may leave the course at any time. When you next log in and access the DCD module, it will ask if you would like to resume the course and will tell you what percentage of the course you have completed.
- Note that to be able to complete the post-module case study and print out a course-completion certificate, you have to go through the entire course content first; otherwise, these components will appear as “locked” on your screen.
